AMENDMENT UNDER 37 C.F.R. § 1.116 Attorney Docket No.: Q78084

Application No.: 10/575,625

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

(Currently Amended): A Group III nitride semiconductor element comprising a

substrate; a first nitride semiconductor layer composed of AlN single crystal having a thickness

of .005 to .5 um which is provided on the substrate; a second nitride semiconductor layer

composed of Al_{x1}Ga_{1-x1}N(0<x1≤0.05) which is provided on the first nitride semiconductor layer;

and a third nitride semiconductor layer composed of $Al_{x2}Ga_{1-x2}N \cdot (0 < x2 < 1 \text{ and } x1 + 0.02 \le x2)$

 $(x1 + 0.02 \le x2 \le 0.5)$ which is provided on the second nitride semiconductor layer.

(Original): A Group III nitride semiconductor element according to claim 1,

wherein said substrate is selected from a group consisting of sapphire single crystal, Si single

crystal, SiC single crystal, AlN single crystal, and GaN single crystal.

3. (Previously Presented): A Group III nitride semiconductor element according to

claim 1, wherein said second nitride semiconductor layer is formed of an island-like structure in

which crystals of different heights are arranged so as to be separated from one another.

4. (Previously Presented): A Group III nitride semiconductor element according to

claim 3, wherein the Al content of said second nitride semiconductor layer differs from region to

region of the island-like structure.

(Canceled).

2

AMENDMENT UNDER 37 C.F.R. § 1.116 Attorney Docket No.: Q78084

Application No.: 10/575,625

6. (Previously Presented): A Group III nitride semiconductor element according to claim 1, wherein said second nitride semiconductor layer is composed of $Al_{x1}Ga_{1:x1}N(0{<}x1{\leq}0.02).$

- (Previously Presented): A Group III nitride semiconductor element according to claim 1, wherein said second nitride semiconductor layer has a thickness of 1 to 500 nm.
- (Original): A Group III nitride semiconductor element according to claim 7, wherein said second nitride semiconductor layer has a thickness of 1 to 400 nm.
- (Original): A Group III nitride semiconductor element according to claim 8, wherein said second nitride semiconductor layer has a thickness of 1 to 300 nm.
- (Previously Presented): A Group III nitride semiconductor element according to claim 1, wherein said second nitride semiconductor layer is composed of an undoped semiconductor.
- 11. (Previously Presented): A Group III nitride semiconductor light-emitting device comprising a Group III nitride semiconductor element according to claim 1; a fourth nitride semiconductor layer provided on said third nitride semiconductor layer of said semiconductor element, said fourth nitride semiconductor layer including an n-type layer, a light-emitting layer, and a p-type layer, which are successively formed atop said third nitride semiconductor layer in this order; a negative electrode provided on said n-type layer; and a positive electrode provided on said p-type layer.
- (Original): A light-emitting diode comprising a Group III nitride semiconductor light-emitting device according to claim 11.
- (Original): A laser diode comprising a Group III nitride semiconductor lightemitting device according to claim 11.

Attorney Docket No.: Q78084

AMENDMENT UNDER 37 C.F.R. § 1.116 Application No.: 10/575,625

 (Previously Presented): A semiconductor device comprising a Group III nitride semiconductor element according to claim 1.

- 15. (Canceled).
- 16. (Previously Presented): A Group III nitride semiconductor element according to claim 4, wherein the second nitride semiconductor layer has a region having a lower Al content at a position closer to the substrate and a higher Al content at a position farther from the substrate.
